DETAILED ACTION

1. After careful consideration and search of the present claimed invention, the examiner finds the claims 5, 11, and 13-20 allowable over the prior art of record.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4, 6-10, 12 and 21-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Galand et al. (5,528,587).

a. In figures 4, 8, 12-15 and the respective descriptive sections, the Galand reference teaches the basic claimed limitations as follow:

Claims 1-4, 6-10, 12 and 21-23

Galand et al.

- Transferring information between a target device and a first buffer which is one of a plurality of buffers
 - Feature of figure 4
- First buffer being pointed to by a current buffer value stored in a controller
 - Feature of (800) being pointed to by (801-804)
- Adjusting the current buffer value stored in the controller to point to a next buffer if the current buffer value is different than a last buffer value stored in the controller
 - Feature of column 14-15, lines 46-50 & 68-3
- Servicing one of the plurality of buffers utilizing one of the current buffer value and the last buffer value from the controller
 - Feature of DMA with interrupt
- Transferring information between a DMA controller and a first buffer
 - Feature of figure 12-13, (134)

Art Unit: 2182

b. Since the Galand teaches the basic claimed limitations, the claimed invention would have been anticipated by the teachings of the Galand referenced.
